

# LIME & EARTH

---

THE ART OF NATURAL FINISHES

ADVANCED SPIRITO LIBERO

A U S T R A L I A

## *Clay Collection*

*A living material, imperfect perfection*

*The Clay collection is inspired by the observation of nature and its inimitable magic: a living, moldable, enveloping, matte, and seductive material.*

*Clay offers a primordial connection to Mother Earth: it does not shout, does not dazzle, does not flaunt it attracts, invites touch, and conveys serenity.*

*Clay is a cultural choice. It appeals to architects, decorators, and designers through its authentic, quiet beauty made of natural sobriety and “imperfect perfection.”*

## *Lime & Earth: the heart of the collection*

*At the core of the Clay collection is Lime & earth, an extraordinary decorative plaster made from lime, natural clay, and Carrara marble powder.*

*This noble material revives the memory of ancient Mediterranean civilizations, adapting it to contemporary tastes with tactile and customizable surfaces.*

*Enhanced with eight exclusive additives — Cocciopesto Ocra, Cocciopesto Terracotta, Glass, Shell, Mica, Clay, Salento’s Stone, and Slate — each wall becomes a unique, living, unrepeatable expression of material art.*

## *Infinite color possibilities*

***Lime & earth** comes in a natural white base and can be colored using Advanced Spirito Libero's Tint allowing complete chromatic freedom and seamless coordination with interior palettes.*

*A breathable, living surface*

- High breathability*
- Regulates and stabilizes indoor humidity*
- Promotes a healthy, natural indoor climate*

*Thanks to its mineral composition, **Lime & earth** naturally absorbs excess moisture and releases it gradually, maintaining optimal comfort and air quality in living environments.*

## *Also for outdoor use*

*With the addition of the Lime & earth Hidro additive, the product becomes suitable for exterior applications, preserving its refined texture and ensuring protection against atmospheric agents.*

## *In conclusion*

***Lime & earth** is more than a surface finish: it is a statement of authenticity, a living mineral skin that defines space with identity and style.*

*It is the ideal choice for professionals who seek timeless materials that connect craftsmanship, nature, and contemporary design.*
